The Total Ecosolutions Advantage

"Fuel Economy" lubricants reduce engine fuel consumption compared to a standard technology lubricant. In fact, thanks to their optimized viscometer profile, Fuel Economy lubricants reduce the friction which is responsible for energy losses, and therefore reduce fuel consumption and greenhouse gas emissions.

The Environmental Performance

Compared to the most widely used TOTAL QUARTZ 7000 10W-40 :

2,5% reduction in energy consumption
(fuel consumption)

2,5% reduction in greenhouse gas emissions
